Who Are Those Unusual Residents in the Lawn?

Bradford Residence

Surrounds, Inc. ■ Outdoor Living Area (Design/Build)

— GRAND AWARD —

The backyard garden oasis encompasses a mountain stream that runs 150 feet from the top end of the property and ends at a 500-square-foot pond filled with colorful koi fish. The entire backyard was treated as a garden with endless masses of perennial and evergreen plants. The installation a 7' tall fence, designed to keep the deer out of the garden, allowed freedom of plant choice. A large grill area was integrated with the house and is located very close to the back door, making it very convenient for year round use. Also, a covered structure anchors the garden with a huge wood burning fireplace plus gas heaters in the ceiling. 🌿
