White Falls

Surrounds, Inc.

Outdoor Living Area (Design/Build)

— GRAND AWARD —

The project involved installing a 20' waterfall using roughly 80 tons of rock work. Within the waterfall area, a fireplace is nestled into the slope adjacent to the waterfall and spa area. Off the rear of the home, we built multiple patio areas and two decks. One deck is for entertaining, while the smaller deck is a cozy space off the end of the home adjacent to the office overlooking the waterfalls. 🌿

EXCELLENCE IN LANDSCAPE PROFILE
